Kittitas County Board of Health:

Kittitas County Public Hospital District #1 operates Kittitas Valley Hospital (KVH).

KVH is currently authorized by the Washington State Department of Health to operate at an inpatient surge capacity of 61 beds. This licensed capacity exceeds current average daily census by approximately 46 patients. KVH is prepared to meet surge demands in our Emergency Department and in our ambulatory clinics as well as our Critical Care and Acute Care settings. KVH is prepared to staff, equip and supply surge volumes.

KVH has cross trained physicians, nurses and ancillary personnel to support additional inpatient volumes in the event of a prolonged surge. We have modified the physical plant to limit exposure to infection for both staff and patients. These modifications include airflow, physical barriers, alternative entrances, exits, patient routes and support space. KVH received additional hospital beds and ventilators from Kittitas County's Emergency Operations Center. The added equipment increases long term ventilator capacity from 7 to 10.

KVH is adhering to the Washington State Department of Health's PPE conservation guidelines. KVH has an on hand inventory of critical personal protective equipment that exceeds anticipated demand at surge capacity for 30+ days. KVH remains on allocation from routine vendors but we have developed new sources for masks, gowns, gloves and cleaning supplies to augment our traditional supply chain. These new suppliers include community donations, KC Emergency Operations Center and the Washington State Hospital Association.

In additional to PPE, KVH has increased on hand inventory of critical medical supplies, medical consumables, laboratory supplies (including test kits) and pharmaceuticals.

KVH has adequate bed capacity to serve our communities and adequate personal protective equipment to keep our workers safe.

Sincerely

Julie Petersen, CEO
